

# We're A Top Technology Consultancy Across The Globe

Unleash the power of software solutions with the pro-expertise of our professionals. We assure you to share the best-in-class solutions that stay reliable and simple for your industry niche.

Let's Brainstorm Your Idea

## What We Aim At?

Coming up with mobile app/web solutions as per the client's requirement is always what we aim at. However, the three core goals that we always keep in mind while building your solutions.

### Reliable & Simple Solutions

We believe in thoroughly studying your requirements and based on that building a fully reliable and simple solution. You can simply keep your trust in us for the most accurate solutions to your requirements.

### Team of Professionals

We seek brilliant multi-dimensional individuals and invest in them by providing one of the city's most comprehensive career coaching and training programs.

### Proven Technologies

Our efforts have yielded software that meets the CISQ code quality requirements. It is safe, easy to maintain, efficient, and dependable. Henceforth, stay assured of our technology consultancy.

## Services We Offer

We provide a wide range of services for your enterprise-level problem, which include web and mobile application, UI/UX design and staff augmentation.

### Website Development

Websites are the core soul of any business in today's time. So, if your business is rapidly expanding then you need the amount of effort to make it competitive. Kalkani Systems is a web development company that helps fast-growing businesses to streamline the entire process, minimise burden, and create a digital identity.

### Mobile App Development

Our top app developers are here to serve you by making the most of mobile technology for your business. We design iOS, Android and hybrid mobile applications to enable you to reach out to your customers on their preferred devices.

### Software Development

Our software development services cover everything right from custom web/app development, API development, system integrations, data migration, and it goes on. For startups, small-to-midsize (SMB), and enterprise-size enterprises, we provide world-class custom software development services.

### UI/UX Design

The fact that UI/UX design plays a major role in the success of an online platform. Every detail counts in product design. Kalkani Systems is a research-driven web design firm that pays attention to every point of detail. To create engaging experiences and appealing interfaces, we focus on rigorous research and constant testing.

### Hire Developers

We have got a pool of talented resources who have experience in working with almost each industry domain. Our team of highly skilled developers can collaborate with you to develop the best-in-class solution for your unique project concept. Hiring our specialised development team is one of the most cost-effective ways to leverage your causes and enterprises.

# How we work

We follow a dedicated process to develop a solution for you. For every development, we go in sprint mode and follow the proper methodology to give you a reliable and cost-effective solution.

## Step 1

### Research & Analysis

Your business concept begins to take shape and develop into a full-fledged product. Defining use cases and recording precise functional requirements are the first steps in the analysis and planning process.

## Step 2

### UI/UX Design

The phase in the design process is to figure out what data you will show to the users, what data it will collect, how users will interact with the end product, and how users will navigate the app.

## Step 3

### Development Phase

It's time to build the final product of your business. The entire coding of your online platform takes place in this part of the entire process of software development.

## Step 4

### Testing Product

Quality assurance (QA) testing is an important part of the software development process since it ensures that the app/website is stable, functional, and secure. Test cases are built which cover all elements of app testing in order to assure thorough QA testing.

## Step 5

### Deployment & Support

Deploy the website or application to its respective place by following the guidelines as mentioned. A strict set of guidelines is made available to deploy a mobile app on the App Stores, We assure you to provide a complete support in case of any queries.

## Technologies We Focus On

We help the startup as well as enterprises to choose the most

we help the startup as well as entrepreneurs to choose the most suitable technology for their online platform. Peep into the piles of technology & tools we offer.
